## PROFILE

I am a Full Stack Software Engineer and I am very passionate and dedicated to my work. With my 15 years experience as a Software Engineer, I have acquired skills and knowledge in numerous fields including web development, mobile development, AWS architectures and many others. I enjoy every step of the development process, from client meetings and gathering requirements to creating software architecture and development.

## EXPERIENCE

### Senior Software Engineer

KPN | AMSTERDAM | 2017 - PRESENT

- Applied clean code practices and design patterns to develop readable, maintainable and scalable code for KPN.com.
- Helped in moving KPN.com from on-premise servers to AWS cloud.
- Improved existing code using SOLID design principles.
- Ensured quality with unit and integration tests and applying TDD.
- Oversee a team of eight software engineers and lead weekly discussions to brainstorm ideas and teach new concepts.
- Java 8, Spring 4, JavaScript, AWS, Mockito, Oracle DB.

### Android Expert Engineer

ADYEN | AMSTERDAM | 2014 - 2017

- Design and develop the Adyen POS cash register application and reliable SDK libraries for integrating merchants.
